LinkedIn Update Pack · Revathy Radhakrishnan

Paste-ready text for each LinkedIn section, matched to my current positions: headline, About, experience, 89 skills, my tool stack, 23 projects and works, and Featured links. Every line fits LinkedIn's limits. Updated 28 Oct 2026. Full background and the fact-check table: `Revathy_LinkedIn_Profile_Source_2026.md`.

1. Headline (pick one, max 220 characters)

A (recommended):
GTM Engineer | GTM Operations at AI Intime | I build the systems behind outbound: buying-signal tools, n8n automation, CRM data ops | Claude Code, Apollo, Twenty CRM

B (title first, quieter):
GTM Operations Associate at AI Intime (Vegam Solutions) | Outbound automation, buying-signal tools, n8n, CRM data operations | B2B manufacturing software & industrial AI

2. About (about 1,300 characters)

I build the systems behind outbound.

For two years I've worked in go-to-market for B2B manufacturing software and industrial AI at Vegam Solutions and its subsidiary AI Intime, selling to chemical, batch and discrete manufacturers, mostly in the US. I started in lead generation and outbound campaigns. Now most of my work is building the tools that make that work faster and better targeted.

What I've built:
• 8 internal GTM tools with Claude Code: buying signals from job postings, account tiering, ICP fit research, event discovery, lead cleaning and meeting-prep research
• n8n workflows that enrich and score a 20,000-company prospect list
• CRM data operations: 29 custom fields and 8,800+ records backfilled from HubSpot into a self-hosted CRM
• A GTM architecture that links every signal tool to the CRM through one shared record and an account heat score

I also took aiintime.com's technical health score from 63 to 92 out of 100 across 13 audit cycles, and I build cost-aware: free-tier data, prompt caching and hard monthly spend caps.

How I work: research first, then build, then document.

Interested in GTM engineering, outbound automation and signal-based prospecting. Happy to compare notes.

3. Experience (keep titles, dates and locations as they are now; replace the descriptions)

Go-to-Market (GTM) Operations Associate

AI Intime (Vegam Solutions) · Full-time · Oct 2025 – Present · Bengaluru, Karnataka, India · On-site

I build and run the GTM systems for AI Intime, an industrial AI company for manufacturers.

• Built 7 internal GTM tools end to end with Claude Code and Docker: buying signals, account tiering, ICP fit research, event discovery and mapping, and lead data cleaning
• Rebuilt Lead Research (v2): benchmark score 5 → 13 out of 15 vs human-assisted research, an Apollo → ZeroBounce → Prospeo email waterfall, and a Claude Code plugin version
• Cut projected AI cost per research report from ~$3.00 to $1.00–1.40 with prompt caching and search caps
• Designed the "Path to Sales" GTM architecture: signal tools → one shared signal record → CRM, with an account heat score
• Built 9 n8n workflows that score a 20,000-company list; migrated all 41 workflows from n8n Cloud to self-hosted
• Added 29 custom fields to Twenty CRM and backfilled 8,806 of 8,875 records from HubSpot; moved call logging into the CRM
• Built and web-checked a 5,900-company account list for a new product use case, 1,450+ rated High or Medium fit
• Built a LinkedIn content system (94-idea plan, 18 flagship posts) and produced code-built product explainer videos
• Ran 13 website audit cycles on aiintime.com: technical health 63 → 92, Lighthouse 99–100, zero accessibility violations
• Set up GA4 conversion-funnel events and a UTM link builder; wrote the traffic plan and blog calendar

Skills to attach: GTM Operations · n8n · Sales Automation · CRM Administration · Claude Code

Vegam Solutions (company group, 5 yrs 2 mos: no description needed)

Sales & Marketing Associate

Full-time · Oct 2024 – Present · Bengaluru, Karnataka, India

Outbound and GTM operations for Vegam's manufacturing software products (MES/MOM, OEE, maintenance, warehouse).

• Generated, enriched and validated 10,000+ ICP-aligned leads across the US, India, the Gulf, Australia, Mexico and New Zealand (Apollo, Sales Navigator, Prospeo, ZeroBounce)
• Ran personalised outbound email and LinkedIn outreach that turned cold prospects into qualified meetings
• Built segmented account lists by industry and persona, from US power and cement plants to chemical and food & beverage manufacturers
• Built look-alike account lists and ran competitor research and analysis; prepared research briefs for leadership sales meetings
• Researched 390+ B2B software directories and listed AI Intime on 32+ of them, including G2, Capterra and Product Hunt

Skills to attach: Lead Generation · Outbound Sales · Account Segmentation · Market Research · Apollo.io

Intern as Application Engineer at Vegam Solutions

Internship · Jun 2021 – Oct 2024 · Hubli-Dharwad, Karnataka, India (LinkedIn currently shows Sep 2021: change the start month to June 2021)

Alongside my B.Sc. (Industry Track) at KLE Technological University: assisted in setting up digital maintenance workflows, SOP configuration and asset data mapping.

Skills to attach: Manufacturing Software · Data Mapping

4. Skills (LinkedIn allows 100; this list is 89)

Pin these 5 at the top: GTM Operations · Sales Automation · n8n · Lead Generation · CRM Administration

GTM and sales operations (20)
Go-to-Market Strategy · Sales Operations · Marketing Operations · ICP Definition · Buyer Personas · Account-Based Marketing (ABM) · Account Segmentation · Account Research · Lead Scoring · Account Scoring · Signal-Based Prospecting · List Building · Sales Prospecting · Outbound Sales · Cold Email · LinkedIn Outreach · Sales Enablement · Market Research · Competitive Analysis · Event Marketing

Data and CRM (12)
Data Enrichment · Data Cleaning · Data Quality · Data Migration · Email Verification · Deduplication · CRM Administration · HubSpot CRM · Twenty CRM · JustCall · Google Sheets · Microsoft Excel

Automation and AI (15)
n8n · Clay · Workflow Automation · Sales Automation · Marketing Automation · API Integration · Webhooks · Claude Code · AI-Assisted Development · Generative AI · Large Language Models (LLM) · Prompt Engineering · AI Cost Optimization · Claude · Google Gemini

Building and deploying tools (9)
HTML · CSS · REST APIs · Web Scraping · Apify · Docker · Git · GitHub · Linux

Web, SEO and analytics (12)
Technical SEO · Keyword Research · Schema Markup · Core Web Vitals · Web Performance Optimization · Web Accessibility (WCAG) · Lighthouse · Google Analytics 4 (GA4) · Conversion Tracking · UTM Tracking · Semrush · Generative Engine Optimization (GEO)

Outbound and prospecting tools (7)
Apollo.io · LinkedIn Sales Navigator · Prospeo · ZeroBounce · Instantly · Dripify · Lusha

Content and marketing (9)
Content Marketing · Content Strategy · LinkedIn Marketing · B2B Marketing · Product Marketing · Copywriting · Blog Writing · Video Production · Canva

Domain (5)
Manufacturing Software · Manufacturing Execution Systems (MES) · Overall Equipment Effectiveness (OEE) · Industrial AI · B2B SaaS

5. Tools I use (for the About section, a portfolio "Stack" block, or interview prep)

Tool	What I use it for
Apollo.io	Prospect and account search, exports, first step of the email waterfall
LinkedIn Sales Navigator	Account and persona search, target lists
Prospeo	Email finding and enrichment
ZeroBounce	Email verification before anything reaches the CRM
Clay	Enrichment and automated enrichment workflows on outbound lists
Lusha, Wiza	Tested for contact data

Tool	What I use it for
Instantly	Cold email campaigns
Dripify	LinkedIn outreach sequences
HubSpot	CRM of record before the migration; exports for the backfill
Twenty CRM	Self-hosted CRM: custom fields, backfill, list uploads
JustCall	Calling; call outcomes synced into the CRM
n8n	Enrichment, filtering, scoring and routing workflows
Claude Code	Building, deploying and packaging my GTM tools
Claude API, Gemini API	AI analysis inside the tools: scoring, research, summaries
Apify, Adzuna, Google Jobs	Job postings and company data for buying signals
Docker, Git, GitHub, Linux	Shipping tools to the internal tools server
Python, FastAPI, JavaScript, React, Next.js, Astro	The stacks my tools and website work run on
GA4, Lighthouse, axe-core, Semrush	Website analytics, audits and SEO
Canva	Creatives and carousels
Google Sheets, Excel	Lists, trackers, campaign data

6. Projects and works (add each under Projects, "associated with" the right position)

Tools I built (associate with GTM Operations Associate)

Job Signal Engine · Sep 2026

Finds US companies hiring for roles that signal a need, from LinkedIn, Adzuna and Google Jobs postings. Flags matches against a 1,805-account focus list and finds the heads and managers to contact. Runs on free-tier sources with monthly spend caps. Python, Docker, Apify, Claude API.

Account Pyramid · Oct 2026

Tiers 2,059 US target accounts by size across 8 industries, with a page per company, lead status per person, and every signal from the other tools on one row. Python, Docker.

Event Explorer · Oct 2026

Shows which target companies attended earlier editions of 260 US industry events and who spoke there, linked back to the account list. Python.

Lead Research v2 · Aug – Oct 2026

Turns a LinkedIn URL into a 14-section meeting-prep report. Co-authored v1, built v2: benchmark score 5 → 13 out of 15, email waterfall, Claude Code plugin. Next.js, Claude API.

Decision Engine · Jul – Aug 2026

Researches a company against the ICP and returns a fit decision where every claim carries its evidence and source. Python, FastAPI.

Signal Engine · Jun – Aug 2026

Market-listening radar: searches Reddit, news, the web and public LinkedIn posts for a pain point and scores every finding for relevance and severity. Python, Claude API.

Event Radar · Mar 2026
My first build: finds upcoming in-person industry events by city or US time zone, with an ICP check per event. JavaScript, React.

Data Cleaner · Apr 2026
A 9-step pipeline that turns a raw Apollo export into a verified, CRM-ready list: enrichment, email verification, clean-up and field mapping. JavaScript.

GTM systems and data (associate with GTM Operations Associate)

Path to Sales GTM architecture · Sep 2026
A 6-stage, 5-layer design that connects every signal tool to the CRM through one shared signal record, domain-based deduplication and an account heat score that routes accounts to the right next step.

HubSpot → Twenty CRM backfill · Sep 2026
Added 29 custom fields to a self-hosted Twenty CRM and backfilled 8,806 of 8,875 contact records (99%) from a HubSpot export; built list-upload tools and moved call logging into the CRM.

n8n Cloud → self-hosted migration · Sep 2026
Moved all 41 production workflows from n8n Cloud to the company's self-hosted instance, verified one by one against their node counts.

MSP outbound engine · Nov – Dec 2025
9 n8n workflows that enrich, filter by cloud partnership and score a 20,000-company MSP list, feeding validated contacts into email campaigns.

BOM Extraction account list · Oct 2026
A 5,900-company account list for a new product use case in the US and Australia, every row checked on the web, with 1,450+ rated High or Medium fit by segment.

Website and growth (associate with GTM Operations Associate)

aiintime.com performance and SEO program · Jul – Sep 2026
13 scored audit cycles and the fixes behind them: technical health 63 → 92 out of 100, Lighthouse performance 99–100, zero accessibility violations, sitewide structured data (20 → 75) and security headers (48 → 72).

aiintime.com growth setup · Oct 2026
GA4 conversion-funnel events, a UTM link builder, keyword research, a traffic growth plan and blog calendar, a new blog post, and a new use-case page with its explainer video.

Product sandbox signup flow · Aug 2026
Domain-gated signup with OTP rate limiting for the product sandbox, plus a fix for an authentication bypass in the launch endpoint.

vegam.co rebuild and vegamrobotics.com staging · Aug – Sep 2026
Shipped the rebuilt vegam.co (Astro) to production and stood up the staging site for vegamrobotics.com, with a local → staging → production release process.

Content and marketing (associate with GTM Operations Associate)

LinkedIn content system · Sep 2026
A content production system for the AI Intime company page: a 94-idea post plan across 10 content pillars, 18 flagship posts and a carousel build pipeline.

Product explainer videos · Oct 2026
Short, code-built explainer videos that turn AI Intime's product use cases into clear visual stories, made with HTML motion graphics and AI voice-over. One runs on the product's live use-case page.

Context and skills file creation · Aug – Oct 2026
Wrote the product context files (positioning, ICP, buyers, use cases, guardrails, messaging rules) that every sales tool and piece of content draws from, and packaged team workflows as Claude skills and plugins, so people and AI tools work from the same source of truth.

Sales and research (associate with Sales & Marketing Associate)

Event-based research and outreach (automated) · Mar – Oct 2026
An automated loop for event-led prospecting: Event Radar finds upcoming US industry events, Event Explorer matches each event's past attendees and speakers against our target accounts, and the Account Pyramid flags which accounts attend which events, so outreach lists are built and timed around the events buyers go to.

Software directory listings · Apr – May 2026
Researched 390+ B2B software directories by domain rating and cost, and listed AI Intime on 32+ of them, including G2, Capterra and Product Hunt.

Look-alike and competitor research and analysis · Apr – Oct 2026
Built look-alike account lists from our best-fit enterprise accounts, mapped a warm account's nearest competitors to find who decides on AI, who delivers it and the best entry point for our product, and ran competitor analyses to sharpen positioning and target selection.

7. Featured (public links that prove the work)

Public proof of my work, all live on aiintime.com: the pages I built for the product, including the instrument printouts use-case page with its explainer video (https://www.aiintime.com/use-cases/instrument-printouts/), the BOM Extraction use-case page (https://www.aiintime.com/use-cases/bom-extraction/) and the AI ROI Map (https://www.aiintime.com/ai-roi-map/), plus my blog post on tribal versus tacit knowledge (https://www.aiintime.com/blog/tribal-knowledge-vs-tacit-knowledge/); my portfolio and resume PDF will join them once the portfolio is online.

8. Education and certification

- **Education:** B.Sc. in Electronics (Industry Track) · KLE Technological University, Hubballi · 2024 · CGPA 8.72
- **Certification:** HubSpot Inbound Marketing Certification · 2025

9. Before you save

1. **Don't notify your network:** every time you edit a position, headline, skill or project, LinkedIn shows a "Share with network" / "Notify network" toggle. Make sure it's switched **off** before you click Save, and post nothing about the updates.
2. **Keep it general:** describe companies and people by industry or role only (for example "a global chemicals manufacturer" or "our sales lead"), never by name, and leave out internal system details and confidential figures.
3. **"Open to work":** recruiters-only setting, not the public photo frame.
4. **Directory listings:** the Capterra listing is publicly visible (with regional versions); G2 and Product Hunt didn't show up in a web search on 28 Oct 2026, so open both listings yourself before saving, because recruiters may click through.

5. **Outreach numbers left out on purpose:** the old campaign figures are 1 to 2 years old, so no reply or meeting counts appear anywhere in this pack.
